BUBBLEGUM

LacGel Collection

SCRATCH
AND ABRASION
RESISTANT
FOR 3-4 WEEKS

EXTREME DURABILITY IN JUST 3 STEPS

From April

Softly spreading lacgel with excellent adhesion – a transition between coloured gels and nail polish. Lasting for as long as 3-4 weeks with no scratching, abrasion and flaking.

#171	#172	#173	#174	#175

USE

1. Cover the prepared nail surface and the entire surface of the hand with Perfect Prep Spray; rough up the nail surface.
2. Apply the colour on the nail surface in two layers, cure each layer separately (2-3 minutes under UV, 30-60 seconds under UV/LED lamp).
3. Cover the nails with flexible shine gel.

CRACKING

A flexible, medium thick shine gel that will spread easily and requires no fixation !

PNZ6044 | 8 ml PNZ6045 | 15 ml

USE

Having the artificial nail built dust off the filed surface, apply Extreme Gloss Gel in one thin layer then cure it (for 2 minutes under UV lamps or 1 minute under UV/LED lamps). Requires no fixation. For lacgel, the shine gel may be applied to the cured colour without fixation.

Évi Darabos - Master Trainer

MATERIALS USED

Pink Masque Acrylic Powder, LacGel #046, LacGel Rapid #01, Perfect Pixie, Extreme Gloss Gel

Velvet Matt Gel

SILKY SMOOTH MATTE COVER GEL

Provide your clients' nail with silky matte finish lasting for weeks with the flexible, medium thick Velvet Matt Gel cover gel requiring no fixation!

USE

Apply the Velvet Matt Gel in a medium thick over layer over the cured second layer of lacgel. Let the material spread for 20 seconds, then cure it (for 2 minutes under UV lamps or 1 minute under UV/LED lamps). Use the product on several nails the same time, so you only have to wait for it to spread once. Requires no fixation.

USE

Suitable for application on matte surface (e.g. for gel paint and the one move technique); you can also apply a cover layer of shine gel requiring no fixation (e.g. Extreme Gloss Gel) on a finished nail, cure it half way then paint the desired pattern onto the surface. For layered builds cure each layer half way. Cures to shiny, requires no fixation. Cure time: 3 minutes (UV) or 60 seconds (UV/LED)

*Be bold with the colors!

Perfect tip

Although the product is non-flexible, you can apply it over flexible nails for smaller patterns. Use our new Silicone Nail Art Pad to create new hues.

new! Gel Laquer Brush #6

A GEL BRUSH WITH ROUNDED TIP, SYNTHETIC BRISTLES

From May

Suitable for the application of colored and building gels on the entire nail surface and also for nail building.

THE BENEFITS OF THE CURVED BRISTLE PROFILE

- it makes the application of the builder gel around the rear skin fold easier
- it makes the wiping of the smile line easier
- the bristling has an ideal width for applying a larger volume of builder materials
- It facilitates the application of coloured materials along the contour

Perfect tip

If need be use AcrylGel Solution for cleaning as it won't leave the bristles dry.

*The application
of the material
is made easier
BY THE ROUNDED EDGE
of the brush.*

SIZE XS METALLIC SPRINKLING BEADS

From April

Use these product as supplements for surface decorations for an even more intricate and eye-popping result.

USE

Use these products as supplements for surface decor jobs – for example, use Glue Gel for attaching the stones then apply the beads at the attaching area of the stones using an Art & Corrector Pen. The small size of the beads allow application in hard-to-reach areas where even the smallest size stones would be too big to fit.

The essential supplements of stone decorations!

THE MOST COMPACT SIZE ON THE MARKET

Perfect tip

Use a Silicone Nail Art Pad to avoid the beads scatter all around.

SPRING COLOR TRENDS

THE ICONIC COLORS RULE

Bring Spring into your salon by using the new BubbleGum LacGel and Aztec LacGel Plus Collections on the clients' nails.

TRENDS KNOW NO BORDERS

The notion "bubble gum color" will make you imagine a loud pink hue, won't it? A fun fact: this colour came about purely incidental. This hue of pink was chosen for the test production of the first bubble gum for the simple reason that this was the only food colourant readily at hand in the factory at the time. And it has been here to stay ever since! And the same is true about the Aztec and merrier patterns. For proof just take a look at all the Aztec-pattern accessories you can see all around once the weather turns nice.

NAIL DRESS STICKER - MARILYN

NAILS IN BUBBLEGUM COLOURS

Be that spring floral patterns or the background colours for Easter decoration, our BubbleGum LacGel Collection offers a wide palette of possibilities. The bubble gum colours look terrific on the finger- and toenails alike, no matter if you apply a Velvet Matt or Extreme Gloss Gel. The Marilyn version of the Nail Dress sticker is the perfect choice for this particular colour collection.

PURPLE GREECE

YELLOW GREECE

PNDK33

BOHEMIAN PATTERNS

You may want to use our Perfect Line brushes to paint patterns with the Aztec LacGel Plus Collection. Or, for a quick job, there are the various way to use our Sirens' Secret metallic holo stickers! As for our Lagoon color, the Purple or Yellow Greece shells are the perfect complements.

*What to use together for
an amazing result!*

The benefits of using dual mode lamps

- I simply call the Fusion Universal dual mode UV/LED lamp "The Island Of Tranquillity" because I never have to keep checking it while in use – the built-in sensors allow the lamp to basically work on its own.
- The peak performance of this lamp is so good that for guests with damaged, thin or extremely sensitive nails don't even have to get their nails put into the lamp: it is enough to expose those nails to the scattered light coming out in the front side of the lamp!
- Use the "Lower Heat" button on the top of the lamp to reduce the light intensity to half, so curing will take place in a more gentle manner – a definite benefit for guests with more sensitive nails.

Perfect ArylGel Tips

- Use the Art & Corrector Pen silicone brush for the application of the AcrylGel! Unlike the traditional spatulas, this silicone brush won't move the nail form, and allows pushing the unused material off the brush with a single flick of the wrist eliminating unnecessary waste.
- The premium quality texture of the Perfect AcrylGel together with the fact that it comes in a jar allows for a waste-free application, as any non-used amount of gel can easily be put back in the jar for later use.
- The ordinary gel cleanser liquids will damage the bristles of the brush. If you want to preserve your brushes use AcrylGel Solution.
- For your guests with thin, damaged or sensitive nails use Elastic Hard Gel as the base layer for your AcrylGel nail building!

*The future belongs to the dual
mode UV/LED lamps: they
are 3 times more powerful,
and cure any type of material
quicker and more steadily.*

- The timer buttons on the clock help you set special cure times – for the unicorn or chrome powders.
- Note:** Never cure the cover shine layers requiring no fixation, for more than 30 seconds!
- The bulbs sit very deep inside the body, allowing for the curing of materials applied on fingers turning slightly outwards without having to continuously reposition and keep the hands in an uncomfortable position.

Baby boomer

ALWAYS A FAVOURITE
article

The success of the Baby Boomer nails compares to that of the classic French nails – this is a fact. Are you still searching for the technique which gives you the best results? Well, search no more: here is the know-how!

Évi Darabos - Master Trainer

MATERIALS USED

Fiber Vitamine Gel, Elastic Cover Pink Gel, Glue Gel, Speed & Shine Top Gel

THE PERFECT BABY BOOMER RECIPE

1. Prepare the nail, then spray it with Perfect Prep Spray.
2. Apply the Elastic Cover Gel on the nail bed; create a transition towards the free edge with an ombre brush; cure it (for 1 minute under a UV lamp or 30 seconds under a UV/LED lamp).
3. Apply the Fiber Vitamine Gel on the free edge; create a fine transition on the nail bed with an ombre brush; cure it (for 1 minute under a UV lamp or 30 seconds under a UV/LED lamp).
4. Cover the whole nail surface with Elastic Hard Gel; if necessary make a C curve; cure it (for 2 minutes under a UV lamp or 60 seconds under a UV/LED lamp).
5. Use Aroma Cleaner to fixate the nail surface.
6. If necessary gently file over the nail surface then apply a cover layer of (Speed & Shine Top Gel) flexible shine gel.

Push Up Manicure Head

SPECIAL DRILL BIT FOR MANICURE

Unlike any other on the market!

Premium gel polishing with just one manicure head that can delay grow-out for up to two weeks!

Russian Manicure effect in a single step.

Also suitable for use on sensitive skin!

USE

After removing the lacgel, push the rear skin fold backwards and use the Push Up manicure head to lift the skin from the nail plate. Then, proceeding from right to left then left to right, clean the nail plate along the contour. Proceed with the preparation and apply lacgel.

Perfect tip

The tougher skin at the nail corners can also be easily removed using the Push Up manicure head to allow the lacgel reach under the rear skin, so the grow-out will only be apparent later. We recommend using our Perfect manicure scissors for more precise results.
